

John Moriarty - a Tribute

With the turn of the high tide
a great mystic soul left our shores
encouraged on his spiritual quest
by the rising of the full Moon
in union with Jupiter
the teacher of teachers.

Mother and guide together
on the eastern horizon
auspicious signs in the heavens
providing safe passage
into the mystery of cosmic life
so earnestly yearned for.

As the fiery Sun set in the kingdom
doors opened into the stupendous dreamtime
for his Divine spark
to be liberated from this giant of a man's body
and drop back into the source
out of which it sprang

Sheltered by flights of angels
joyously welcoming home one of their own
leaving us to ponder with wonder and awe
upon a rich legacy
he so eloquently and reverentially
initiated us into

Our grief is for this national treasure lost to Ireland
that had little place for a great visionary
who aspired to raising our eyes above the horizon
with the depth of his spiritual knowledge and profound wisdom
so badly needed.....
we will remember with fondness the hands waving
electrified in his wild head of hair
as he passionately pleaded with us
to see ourselves as pure as a raindrop on a lotus leaf
living a life richer than the coma we settle for
by following where the unravelling thread of our fantasies is leading
until we find the regal within us
that lets us shine

In honour of his memory
let us join together in spirit as he once guided us
and close our eyes
sounding three times the sacred AUM (Ogham)
in harmony with the music of our spiralling universe (one verse)
and meditate in silence on its mystery
surrendering in faith to where it is taking us.....
